OBJECTIVE:

Computer Science student at Syracuse University, seeking a Summer 2027 software engineering internship. Experienced in C and systems programming, with personal projects in search algorithms and game development.

EDUCATION:

Syracuse University, College of Engineering and Computer Science **Anticipated December 2027**
Bachelor of Science in Computer Science

SKILLS:

- Languages: C, C#, Python, Java, Racket, Haskell, x86 Assembly, Bash, GDScript
- Concepts: Data structures and algorithms, systems and network programming (processes, sockets), computer architecture (caching, virtual memory), software design (UML, design patterns), natural language processing
- Tools & Platforms: Linux, Git, Godot, WordPress
- Spoken Languages: English, Spanish (C1 / Working Professional)

RELATED EXPERIENCE:

Web Developer New York, New York **May 2026 - Present**

- Partnered with local printing company to expand services into websites, as company was frequently asked about website services but offered no such services previously
- Designed front and back end sites for clients solo by commission, presenting weekly updates and discussing one-on-one with clients about site needs and possibilities
- Conversed with clients in English and Spanish, and with clients in the US and South America
- Reworked company's own website, allowing for orders and invoices to be processed online

RELATED PROJECTS/APPLICATIONS:

Box Art: Puzzle Game & Optimal Level Solver **February 2026 - Present**

- Built game in Godot 4 using signal-driven managers, quaternion-based cube rotation with slerp-animated, drag-controlled rolls, and stack-based undo/reset history
- Designed a solver for finding minimum number of moves for any level, using A* search over cube orientation (a 24-element rotation group), paint, and goal state, guided by an admissible tour-based heuristic
- Rewrote the Python prototype in C with precomputed shortest-path tables between key tiles, cutting solve time from ~2000 ms to 7 ms per level on average
- Verified optimality against a brute-force search on 4,000+ random levels, then generated a 1,000-level library across 3 board sizes and 7 difficulty tiers, finding and correcting levels with inaccurate move targets.

La Posada de Mindo: Hotel Website & Booking Service **August 2026 - October 2026**

- Reworked an outdated website from ground up, updating old website functionalities while adding new utilities to create a full management system with direct online booking, room availability viewing, and an administrator page
- Increased website traffic and reduced operating costs by eliminating booking cuts taken by third-party websites

WORK EXPERIENCE:

Building Manager Syracuse, New York **December 2025 - November 2026**

- Managed a 192,000 sq foot building, setting up for events, helping patrons, and solving problems around building

Counselor / Lifeguard (Seasonal, Summer) Los Angeles, California **June 2022 - August 2026**

- Began as a counselor and worked up to being a lifeguard for a summer camp in Los Angeles, working 10 full weeks each summer for 5 years

Food Service Syracuse, New York **August 2024 - Present**

- Tended to multiple cafés around campus, learning to work calmly in a high-stress environment and through heavy rushes of 100+ students
